ABOUT ME

“

Over nearly 4 years of hands-on experience in Web, Mobile, and especially ERP systems, I've realized my greatest motivation is seeing technology solve real business pain points. I don't believe in quick fixes or patchwork solutions; instead, I always dig deep to identify and address the root cause of any issue. Whether automating a manual process or scaling an ERP system across multiple departments, I take full ownership of the outcome—ensuring the system runs smoothly and delivers actual value, rather than just handing over the code and walking away.

OBJECTIVE

As a **Full-Stack & ERP Engineer** in the AI era, I position myself as a strategic **Problem Solver** — one who masters technology rather than depending on it blindly. With nearly **4 years of hands-on experience** in complex enterprise systems, my core strength lies in **root-cause analysis**: diagnosing and resolving the operational bottlenecks that actually hurt the business. My goal is to harness **AI Agents** and modern tooling to sharpen my own productivity, while architecting real solutions that help organizations **automate workflows**, cut costs, and build a lasting competitive edge.

EDUCATION

Saigon University of Technology

SEP 2018 - OCT 2022

MAJOR Information Technology · Development Web

GPA 3.0 / 4

SOFT SKILLS

- Problem-solving & root-cause analysis
- Clear communication with stakeholders
- Calm under pressure & strong multitasking
- Continuous learning & self-improvement
- Quality-first mindset & proactive defect prevention

- Technical leadership & team mentoring
- Work independently and collaboratively
- Detail-oriented & quality-focused
- Agile mindset & quick adaptability
- Ownership — take full responsibility for outcomes

HO CHI MINH CITY BOOK DISTRIBUTION CORPORATION - FAHASA

SEP 2022 - MAY 2026

387 - 389 Ba Trung Street, District 3, Ho Chi Minh City

Mobile & Web Application Developer

SEP 2022 - AUG 2024

STACK

React Native 0.66

ReactJS

Node.js 18

- › Built and maintained F-Hub — an internal mobile app (React Native 0.66 + Node.js 18) covering core daily operations: reporting, task tracking, workflow approvals, leaderboard rankings, product lookup, inventory inspection, and stock counting
- › Reduced 2+ hours of manual daily operations per employee by digitizing key business workflows end-to-end
- › Implemented real-time features (WebSocket), file upload handling, and secure communication with internal APIs
- › Delivered an admin dashboard (ReactJS) enabling user management, activity monitoring, and operational data analysis

Head of Department — System Software Development

SEP 2024 - MAY 2026

STACK

iDempiere

Java 8

Java 21

Spring Boot 3

PostgreSQL

MongoDB

Redis

ReactJS

- › Led iDempiere ERP customization — developed custom iDempiere ERP modules to automate and optimize enterprise-wide business workflows, replacing manual paper-based processes
- › Designed and implemented a catalog synchronization process across Fahasa and Fabico tenants, ensuring data consistency and business rule alignment between both iDempiere instances
- › Built additional ERP support features for cross-functional business operations and improved end-to-end data traceability across the enterprise
- › Architected and shipped an internal Dev & Ops Dashboard (React 19 + Spring Boot 3 + Java 21) — covering cluster health monitoring, POS sync tracking, database backup status, standby replication, and Keycloak SSO authentication
